Who We Are

-+++++-+ -+++++

Palantir builds leading software platforms for data-driven operations and decision-making.

INDUSTRY RECOGNITION

- Gartner MQ™ for Data Integration Tools named Palantir a Visionary
- Dresner Advisory Services ranked Palantir #1 in eight categories of its 2023 Technology Innovation Awards, including “AI, Data Science, and Machine Learning”
- Forrester Wave™ named Palantir a Leader for AI and ML Platforms
- IDC ranked Palantir No. 1 in Worldwide AI Software Study in Market Share & Revenue

OUR CLIENTS INCLUDE

OUR DELIVERY PARTNERS INCLUDE

Powering critical decisions for operators across industries.

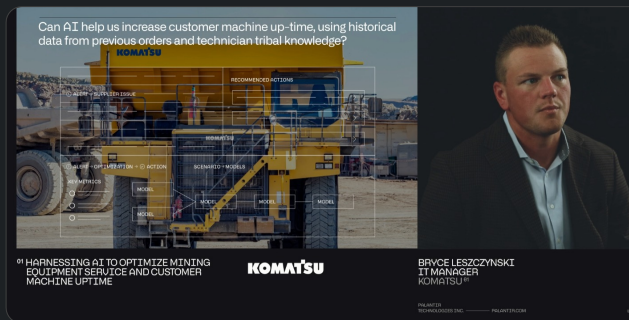

- TITAN, the Army's first AI-defined vehicle
AI/ML powered next-generation intelligence

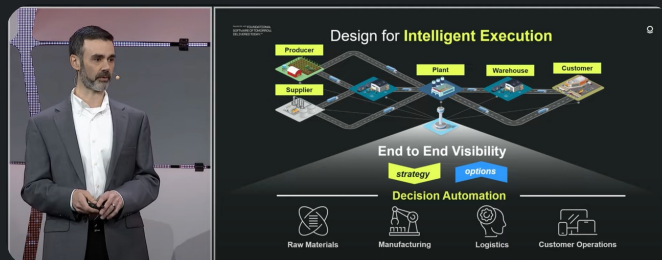

- Accelerate clinical trial delivery
Parexel, Novartis, Merck, & more

- Komatsu's construction and mining operations
Optimizing equipment service and machine uptime

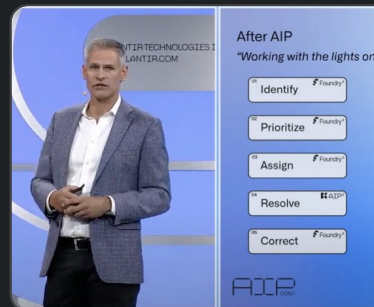

- General Mills' complex supply chain processes
Driving AI-enabled supply chain automation

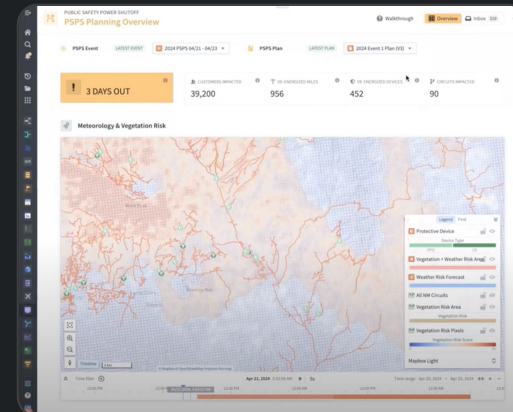

- Panasonic Energy of North America
AIP + mixed reality for frontline operators

- Eaton power management
Raw material rebalancing

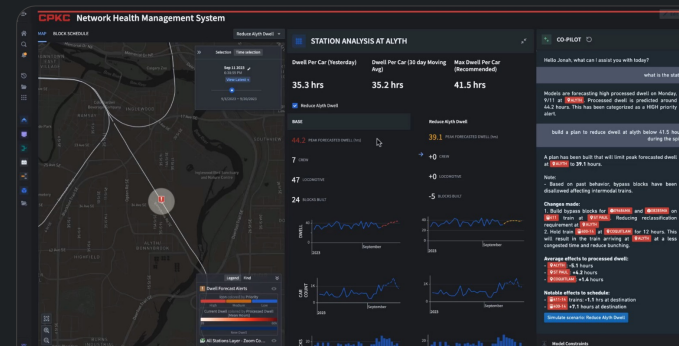

- PG&E frontline wildfire support
Public Safety Power Shutoffs

- New York Stock Exchange
Automated market analysis insights

- CPKC Rail's nationwide railroad operations
Managing network health for a 20k+ mile network

- Ukraine education efforts
Ministry of Education

Palantir Partners with Ukraine's Ministry of Education

To help provide 300,000 pupils with access to safe in-person learning

How can AI power operational decisions?

Commodity workflows like code co-pilots, chatbots, and app assistants are insufficient to power operational decisions.

Generative
AI / LLMs

Commodity
Workflows

Operational
Decision-Makers

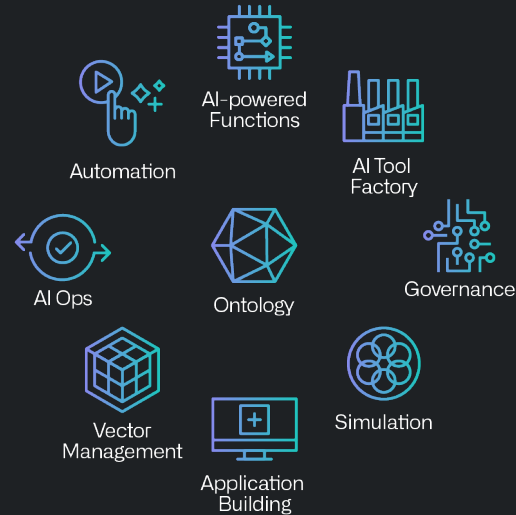

Palantir's AI Platform embeds LLMs into operational decision-making

From secure LLM access to rich end user applications, Palantir provides an integrated architecture that brings AI to every decision.

Requirements for AI in an Enterprise

Palantir provides the AI platform to activate LLMs and other AI within enterprise decision-making.

Ontology (Data + Action + Logic)	Operational Interfaces
Industry-Leading Security	Orchestration across LLMs & existing systems
AI Tool Factory	AI Ops
Scenarios	Automation
Decision Lineage	Pipeline Building
Edge Integration	Vector Management

Anchoring AI Within Your Enterprise

To power decisions, AI must be grounded with the enterprise's data, logic, and action.

Enterprise Data

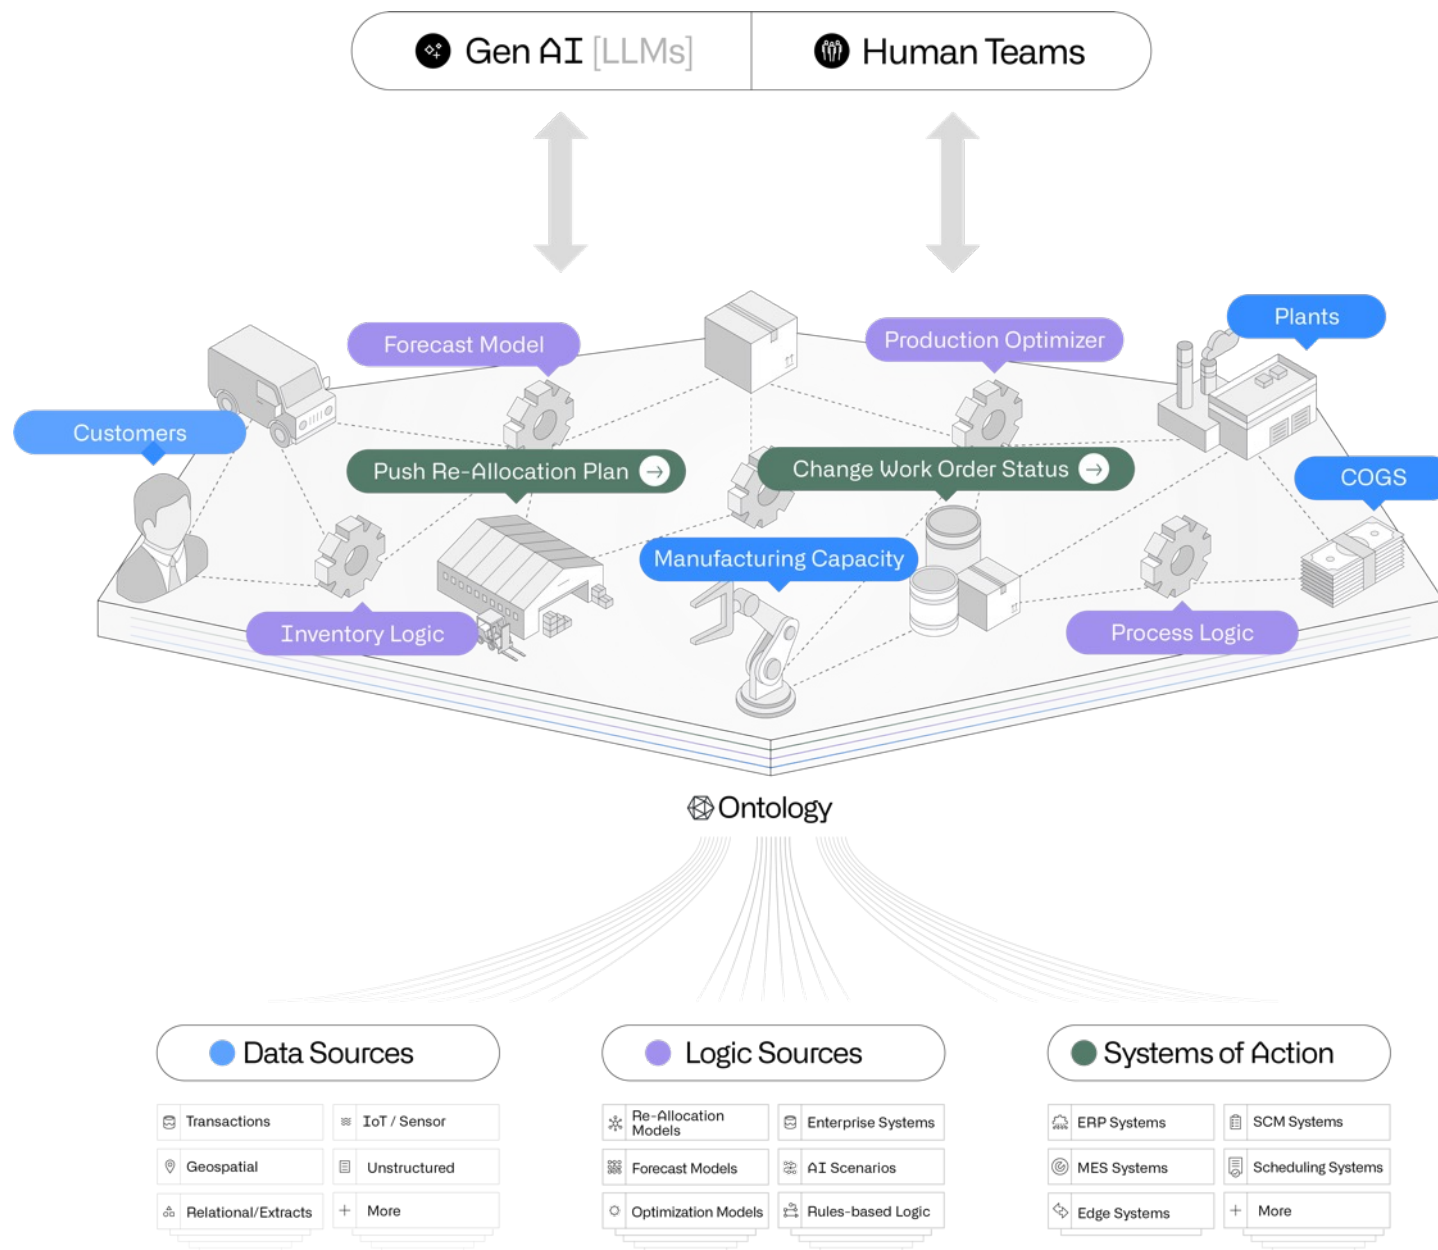

Real-time integrated data, modeled in the language of the business

Enterprise Logic

The conventional models, algorithms, business logic - across the business

Systems of Action

The substrates where decisions must be activated – ERPs, transactional DBs, edge platforms, et al.

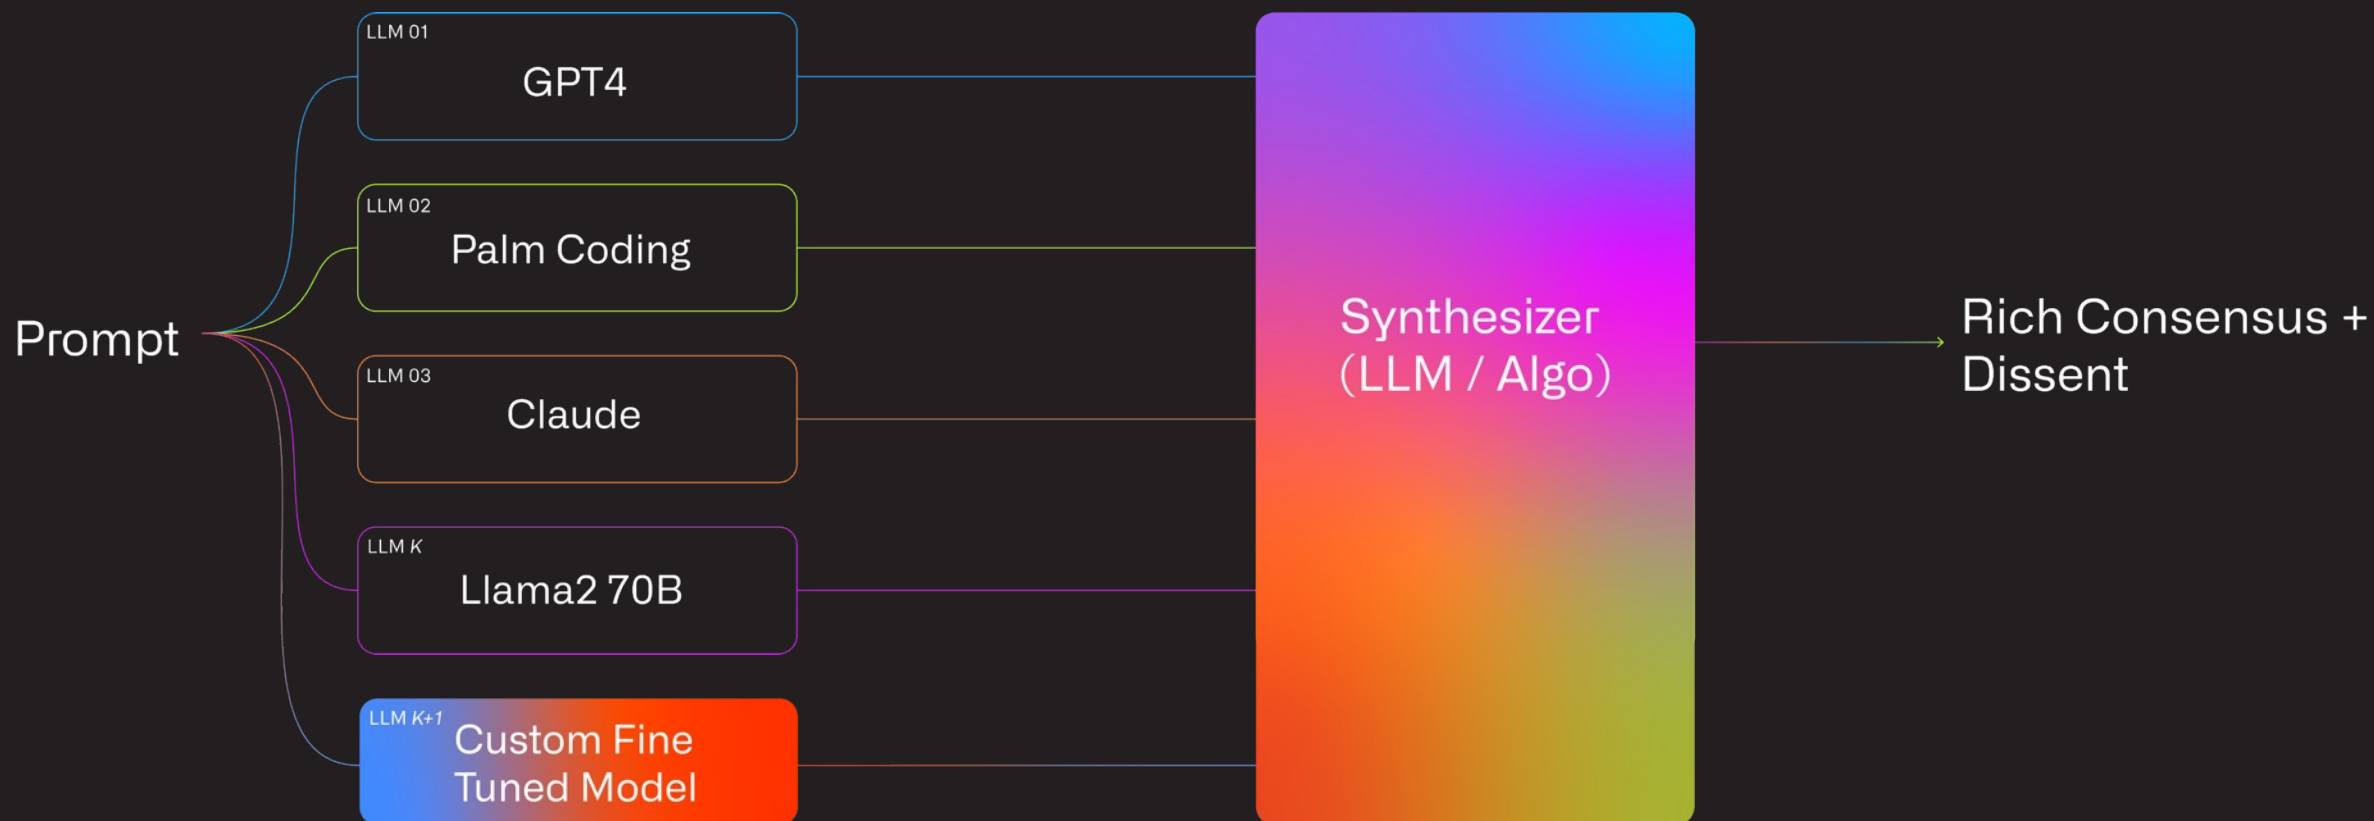

Palantir Artificial

What is an AI
Platform?

Never Use 1 LLM When You Can Multiplex LLMs

Operational Interfaces & Feedback

Making AI systems better in the context of your company requires the ability to learn from operators.

AIP enables you to both run your operations and continuously improve AI actions.

Human + AI Actions

Single interface for analysis and triggering actions in other systems

Operator Feedback

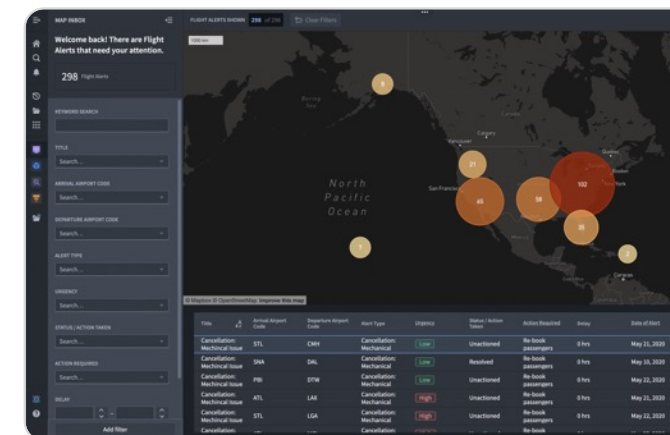

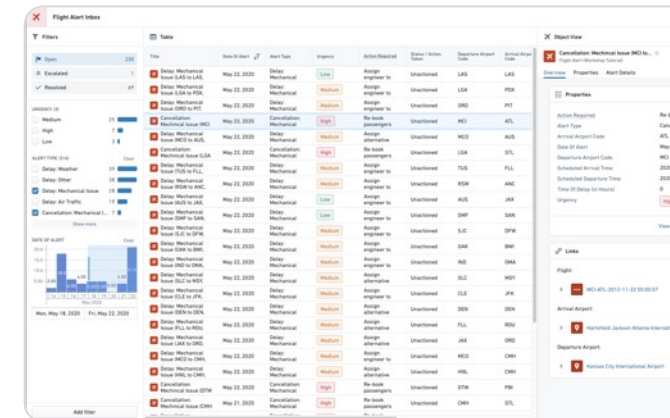

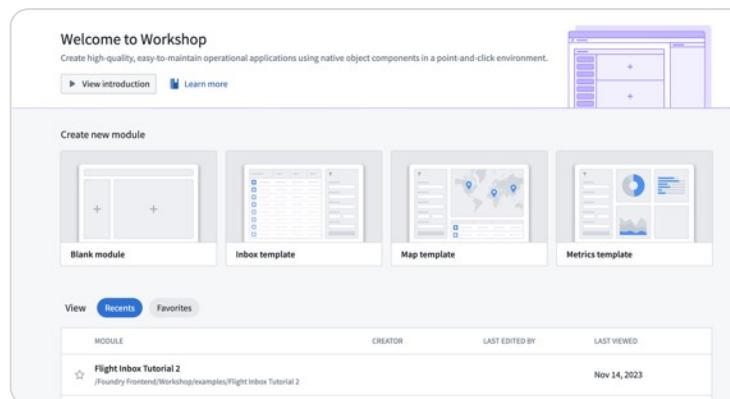

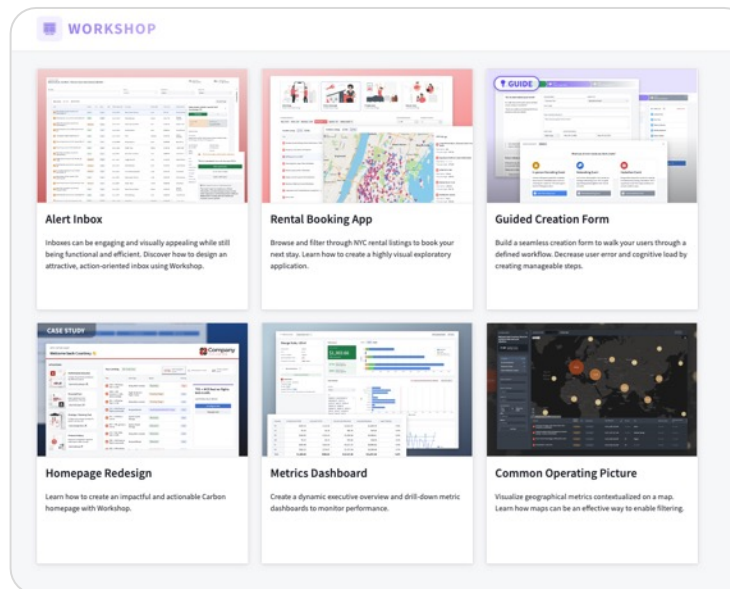

System improves from direct instructions, akin to a human teammate

AI Driven Actions

AI can autonomously drive actions with confidence thresholds

Transparency + Oversight

Every action is audited and tracked automatically, enabling E2E governance

AIP in Action

“We are building for the future, on a platform that we think is scalable for the future.”

SHAILESH YERRAM, AVP, BUSINESS INTELLIGENCE & CISO, CPKC RAIL

“I now understand why Palantir continues to tell us that AIP is about the tools. This is where the secret sauce sits – in the orchestrations that LLMs are making amongst the various tools, APIs, and data.”

FOUNDRY PLATFORM PROGRAM MANAGER, SWISS RE

“It helps us make sense out of the massive volumes of data that we’re creating all of the time. And it gives our operators this natural language interface to interact with, to really make these complex decisions when they need to be making them.”

Jacobs

SHANNON MILLER,
EVP & PRESIDENT, DIVERGENT SOLUTIONS,
JACOBS

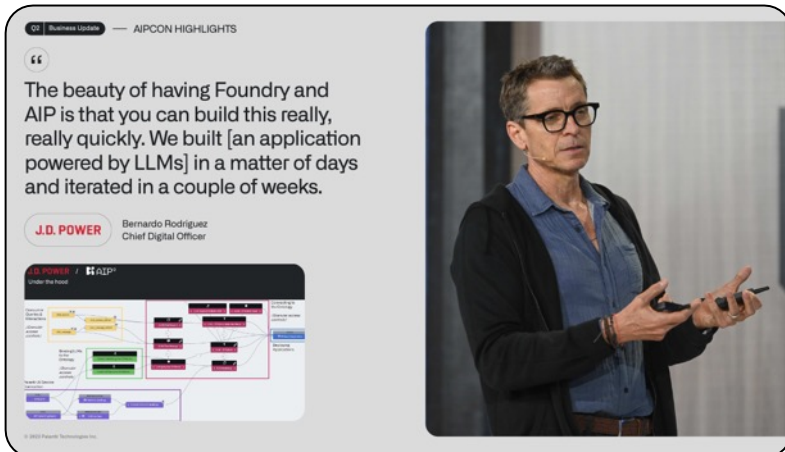

“This technology is truly going to revolutionize how we manage our global supply chains and interact with cross-functional teams.”

JARED ANDERSON, SUPPLY CHAIN MANAGER, INTERNATIONAL, FOCUS BRANDS

“Sometimes it takes over an hour to go try all of those [material shortage] solutions, and we can do that with a click of a button now with AIP.”

EATON

BRIAN FIFAREK,
VP SUPPLY CHAIN DIGITALIZATION,
EATON

“We worked with Palantir and got the results that we wanted in less than eight hours. We presented to our CEO the very next day.”

TRINITY INDUSTRIES, INC.

ELLIOT SMITH,
DATA SCIENTIST,
TRINITY INDUSTRIES, INC.

“Within one month, we were able to give [our teams] the tools that took that four hour process and condensed it down to 15 minutes.”

Panasonic ENERGY

JUSTIN HERMAN,
VP & CIO,
PANASONIC ENERGY OF
NORTH AMERICA

“

Palantir’s AI solution-centric vision makes it an attractive platform for enterprises that wish to implement AI quickly... Reference customers appreciate the breadth of capabilities within the [Palantir Foundry] platform, particularly for the security and governance of ML which is critical in many environments.
